PROFESSIONAL SUMMARY

Data Analyst with 2+ years of healthcare analytics experience at Cerba Lancet Nigeria, one of West Africa's largest diagnostic lab networks. Build and deploy production data pipelines, operational dashboards, and automated reporting systems used by laboratory supervisors and senior management across nine sites. Experienced in SQL, Python, Excel, and Power BI, with hands-on expertise in laboratory operations, clinical research, and turning complex data into actionable operational insight. Co-author of peer-reviewed research published in *Hydrology* (2023).

SKILLS & DOMAIN EXPERTISE

SQL & Databases: MySQL — CTEs, window functions, recursive CTEs, joins, staging tables, data transformation.

Python: Pandas, JupyterLab, MySQL Connector, data pipeline automation.

Excel: PivotTables, Power Query, SUMIFS, AVERAGEIFS, COUNTIFS, VLOOKUP/XLOOKUP, MAXIFS, dashboard development

BI & Visualisation: Power BI, Tableau, Excel dashboards, interactive KPI reporting.

Domain: Healthcare analytics, laboratory operations, clinical research data management, data governance, data protection compliance.

PROFESSIONAL EXPERIENCE

Data Protection Officer | Cerba Lancet Nigeria | Lagos, Nigeria *Jul 2025 – Present*

- Prepared NDPA compliance documentation for the 2025 audit, resulting in the organisation receiving its Audit Trust Mark
- Built an internal audit checklist and ran quarterly compliance audits across 10 sites, completing full Q1 2026 coverage
- Drafted an updated incident response template and data breach protocol SOP aligned with the NDPA GAID legislation
- Delivered data protection awareness training to 50+ staff across Q3–Q4 2025 and Q1–Q3 2026, covering data protection policies and practical compliance best practices

Data Analyst / Clinical Research Data Analyst | Cerba Lancet Nigeria | Lagos, Nigeria *Dec 2024 – Present*

- Built and evolved a five-stage laboratory TAT analytics pipeline from a manual weekly Excel process into a full-stack operational intelligence platform, lifting TAT compliance from ~50% to 70%+ across 9 sites. The current system uses React, Supabase/PostgreSQL, and database-enforced authentication, giving supervisors and management access to weekly performance across sites, departments, shifts, days, tests, TAT failures, and sample movement
- Designed a lab operations Excel dashboard tracking 4 KPIs across all sites with dynamic filtering by year, month, week, site, and department — used in live operational and management reporting
- Built a Customer Experience & NPS dashboard for Marketing, management, and stakeholders, transforming Microsoft Forms exports into an interactive view of NPS, response trends, branch performance, service satisfaction, facility experience, demographics, complaints, customer verbatims, and recommendations.
- Built an Inventory Reorder Tracker covering 100+ lab supplies; automated stock alert logic shifted procurement from reactive to planned
- Implemented a secured MySQL database for clinical trial data, enabling fast participant querying and structured EDA across active studies
- Process and clean 20,000+ weekly lab records across 9 sites; build TAT reports and Power BI dashboards for QA and senior management

Communications Strategist / Analyst | WNT Capitas Ltd | Lagos, Nigeria *Jun 2024 – Dec 2024*

- Managed WATRA's LinkedIn, Instagram, and X accounts; created a weekly telecoms policy series that expanded audience reach across West Africa and Europe
- Ran quarterly analysis of media coverage data to identify which platforms pushed client stories most, and cut those that rarely did
- Built a live payment tracker that resolved all outstanding billing discrepancies between WNT Capitas and Lafarge Africa from 2022 to 2024

Quality Assurance Personnel (NYSC) | Flour Mills of Nigeria — Golden Penny | Lagos, Nigeria *Jan 2023 – Dec 2023*

- Ran noodle cake weight checks at three daily intervals per shift and logged results against standard specifications
- Analysed shift records to find that fully new-staff shifts had the highest weight deviation; presented findings to the supervisor, leading to a roster restructure that put at least one experienced person on every shift

Quality Assurance Intern | Bagco Morpack Nig. Ltd | Lagos, Nigeria *Jun 2021 – Nov 2021*

- Carried out quality checks on raw materials and packaging — shrink tests, weight checks, printing and sealing inspections — flagging defects before products reached distribution

EDUCATION

B.Sc Chemistry | Lagos State University | Lagos, Nigeria *Jan 2018 – Jul 2022*

Thesis: Physicochemical and ecological assessment of groundwater across 25 wells at Lagos State University using AAS, APHA methods, and WHO standards. Findings published in Hydrology Journal (2023).

Member, Student Chemical Society of Nigeria (SCSN) — LASU Chapter

PUBLICATION

Majolagbe, A.O., Yusuf K.A., Tovide, O.O., Alegbe, M.J., and Tiamiyu, Y.A. (2023). Groundwater Characterization and Ecological Assessment: A Case Study of Lagos State University, Ojo, Lagos. Hydrology, 11(1), 1-10. https://doi.org/10.11648/j.hyd.20231101.11

KEY PROJECTS

Lab TAT Analytics Platform

Python, Pandas, React, Supabase/PostgreSQL

ETL pipeline and React/Supabase dashboard used across 9 lab sites, with drill-down by site, department, shift, day, and test. TAT compliance rose from ~50% to 70%+, and weekly reporting went from a full day to about 2 minutes. Demo: yusuf-tiamiyu.github.io/lab-tat-platform-demo

Customer Experience & NPS Pipeline

Node.js, Python, pandas, Chart.js

Daily pipeline at work that cleans Microsoft Forms survey exports, scores NPS, tags complaint themes and keeps customer contact details off the shared dashboard. The public demo, on 1,350 synthetic responses, shows NPS rising from +6 to +31 after a callback programme. Demo: yusuf-tiamiyu.github.io/nps-customer-experience

What Drives Lab TAT Breaches?

Python, pandas, statsmodels, SciPy

Logistic regression and interrupted time series on 111k synthetic test records from a nine-site lab network. Showed that a process change lifted compliance from 53% to 72% beyond any existing trend, and that two short-staffed sites caused a quarter of all breaches.

How Far Can Daily COVID-19 Numbers Be Trusted?

MySQL 8 - recursive CTEs, window functions, gaps-and-islands

Data-quality study of daily case reporting in 208 countries. Found 21 large-outbreak countries reporting in batches and wrote a SQL correction that keeps totals exact and cuts day-to-day noise by up to 91%.
